

Aldabra Coffee LLC

02/22/2019

Good business nearby and further out for Brazil primarily.

Brazil nearby GC MTGB trades -11, April May June at -12, further outs offered long spreads from -17. Very good demand from most sectors for something

Colombia remains high whilst FNC reviews producer pricing and internal support systems.

EP and UGQ start at + 21.

Guatemala offers SHB EP from + 28 – still much to be sold.

Whilst Honduras and Nicaragua continue chipping away at current market differentials one day at a time.

HG EP from + 1 – demand and trading for all sorts of Certificates very healthy.
